NIGHT SCHOOL OF Y.M.C.A. OPENS

120 Students Enrolled and It Is Expected Number Will Reach 300

The Y. M. C. A. night school opened last night with an enrollment of 120 students. This is as many on the opening night as there were at the end of the opening week last year. It is expected that three hundred will be enrolled during the school year, which comes to a close next April. The classes in shorthand, typewriting, bookkeeping, mathematics and drawing for machine shop apprentices will begin this evening. The special group course in the most important of the grammar school subjects for employed boys who were not able to finish the eight grammar grades will also be started tonight. This course is conducted by the boys' department in separate rooms, and there is still room for four new students in the class. One of the features of the year's work in the educational department will be a class in show-card writing. This course will be valuable to clerks in retail stores, and it is hoped that the enrollment will be sufficient to make the course a permanent one. On account of the large amount of space devoted to the educational classrooms, there will be room for a number of new students in nearly all of the courses which will be started tonight.

The membership committee will hold its regular monthly meeting on next Thursday, at which time a large number of new members will be elected. There are already eighty-one applications for senior membership on file, and it is expected that this number will be raised to one hundred.

Next Thursday noon the monthly meeting of the board of directors of the association will be held, and the reports of committees, the election of members, and the consideration of a joint meeting of the trustees and the finance committee regarding the association's finances bearing on the subject of providing funds to carry the association without debt up to the first of next May, the close of the fiscal year, will be the business of the meeting. It has always been the policy of the financial committee to provide the money in advance instead of having a scramble at the end of the year to close the year's work free from debt.

"TRAGEDY OF DESERT" MAKES HIT AT HAWAII

"The Tragedy of the Desert," a two-reel film billed for Wednesday and Thursday night at the Hawaii theater, is all that its name implies—a tragedy in the Sahara desert. Like "Under Two Flags," the play that made Blanche Bates famous, the scene is laid in Algiers and the Sahara desert. The picture centers around an English doctor who leaving over trouble with his wife, makes for the desert to forget and be forgotten. He gets into a Moorish camp and being received with open arms he becomes a convert to their religious belief. In the course of time he marries a Moorish maiden and forgets about civilization. His English wife, who has given him up for dead, with a number of travelers on making a trip through the Sahara wanders into the camp and recognizes her husband. She tries to induce him to go back to England but without avail. In the meantime his Moorish wife, thinking he has weakened and intends to go back to his first wife, commits suicide. The scenes that follow are thrilling and full of heart interest. The two reels keep one spell-bound as it were, so interesting and full of excitement is the story. Besides the feature picture, two others will be shown—one a western story entitled "The Daughter of the Sheriff" and the other a comedy that will arrive by the Honolulu tomorrow morning. Despite the added expense of the feature film the same prices will prevail. Tonight's program is replete with comedy and melodrama.

A. MEACOCK TO BE PACIFIC CLUB STEWARD

Archibald Meacock, the popular second steward of the Matson liner Waihelina, who is well known to traveling Honoluluans, has been selected to become the steward of the Pacific Club, the most exclusive organization of its kind in Honolulu. Meacock, besides being a past master of his craft, is an ardent admirer of Kipling, who he is fond of quoting unabridged and by the meter.

NEW FIRE ALARM SYSTEM HERE; CONTRACT WITH TELEPHONE CO.

Articles of Incorporation Filed by Local Business Men

Articles incorporating the Denio Telephone Fire Alarm Co., of Hawaii Ltd., were today filed with the Treasurer of the Territory. The capitalization of the company is \$50,000, fully paid up. The incorporators of the company are Robert W. Shingle, Albert N. Campbell, Alfred L. Castle, and Eugene M. Campbell of this city, and Mr. C. B. Potter of San Francisco, Cal. The officers named in the incorporation papers are R. W. Shingle, President; A. L. Castle, Vice-President; E. M. Campbell, Secretary; and A. N. Campbell, Treasurer. These four gentlemen with Mr. Potter constitute the Board of Directors of the company.

This company has been formed to handle and install in the Territory of Hawaii the products of the Denio Electric Co. of the city of Rochester, New York, which company is one of the strongest electric companies both financially and personally in the United States, the principal product of the company being the Denio Telephone Fire Alarm appliances. The Denio System is one which has, after long years of patient and careful study and investigation, and the expenditure of large sums of money, been brought to its present high point of efficiency, and is claimed to be the only auxiliary fire alarm system that has successfully passed the test of the highest insurance authorities in the United States.

This system it is stated is not only recommended by the best telephone and electric engineers of the United States, but is also recommended by the National Board of Fire Insurance Underwriters, and it is one of the few fire fighting appliances that has received the unanimous vote of the Board of Control of the National Board of Fire Underwriters, this board consisting of 22 of the best informed men on insurance and fire fighting appliances in the United States, and the Board as a unit passed the Denio System.

The system has also been carefully studied by the insurance underwriters of the Territory of Hawaii, and after nine months of careful investigation and study, the Territorial Board has voted to accept and recommend this system to the people of the Territory. R. W. Shingle and A. N. Campbell, before concluding their negotiations with Mr. Potter, took five months to acquaint themselves with all the points of the system.

The system is one which is operated entirely over the telephone circuits, hence every person or firm with telephone connections in either their home, store, warehouse, or office can have one of the boxes of the company installed thereon.

The system operates both manually from a box bridged on to the telephone switch board in the central telephone station, all business of the company being transmitted from the private trunk lines of the Fire Alarm Co., and no business of any other character is transmitted over these private lines. The average time of the transmission of a message after the pushing of the button in the manual box to fire headquarters is eight seconds.

WILL OPEN PANAMA CANAL IN OCTOBER OF NEXT YEAR

Commission Report Based on Latest Estimates, with Assurance That Seas Will Join in Twelve Months

WASHINGTON—In just 12 months from now a vessel will go from the Atlantic to the Pacific Ocean through the Panama canal according to new revised estimates published recently at the Panama canal commission. The tentative date set for passage of the first vessel through the canal is Oct. 15, 1913. The first passage will be made by a naval vessel.

President Taft has been advised of the latest estimates of Colonel Goethals, in charge of canal construction work, and his approval of the new canal opening program is awaited.

Formal opening of the canal will occur Jan. 1, 1915, it is announced. Commercial vessels will be given its unrestricted use in December, 1913. That the canal will be completed far below the estimated cost of \$400,000,000 is reported by Colonel Goethals. It may run as low as \$375,000,000. About another \$1,000,000 will be saved, it is declared, in bond interest charges.

It is predicted that the canal will be completed without further issuance of bonds.

The amount of excavation completed up to Sept. 15 was 218,000,000 cubic yards, leaving approximately 24,000,000 yards still to be dug. The average rate of excavation per month is now about 2,500,000 cubic yards, a conservative estimate. At the present rate of progress all the digging should be finished before Sept. 13, 1913.

FLORENCE MAY FIND MOTHER AT DOLL SALE

Florence wants a mother. She hasn't stipulated what kind of a mother she wants; how old she must be or anything concerning her ability as a mother, because Florence knows who ever adopts her just can't keep from loving her and giving her the proper amount of motherly attention. Florence is quiet tiny for a little girl, but just about the right size for a doll and she has on the prettiest white dress and blue sash, a girl ever looked at. Her hair is dark and curly and it has a bright blue ribbon tied around it, just like all little girls her

age wear. The reason she wants a mother is because she has no other name and it is very hard to distinguish Florence from all the other Florences in the world if she hasn't a surname.

Saturday of this week at the Royal Hawaiian hotel, Florence will be on exhibition and for sale by the King's Daughters for the benefit of their old ladies home. Whoever buys this girl will not only bring happiness to some one in their own home but grant a portion for the old ladies who are eagerly awaiting the new quarters.

While the Denio System has been in operation in many of the cities in the Eastern portion of the United States and has to its record the saving of a vast amount of property from loss by fire, it has been within the last two years that it has been given publicity through the western portion of the country and it is now being installed in a large number of cities and towns on the Pacific Coast. The installation at the present time is in progress in San Diego, Los Angeles, and a number of other California cities as well as in Portland, Oregon, and a number of other cities in that State.

The Denio Company of Hawaii has entered into a contract with the Mutual Telephone Company, Ltd., of this city for handling their business in this city over the Mutual Telephone Co.'s lines, thus assuring a service that will be under social management.

The cost of the service, which ranges from six dollars per year, or less than two cents per day in the home, to ten dollars per year in the store or factory.

The offices of the company are located in rooms over the Hawaiian Trust Co., Fort Street, where a full demonstration of the system will be given to any who care to call.

Beer Exposed to Light for 5 Minutes Becomes Undrinkable

This is not our statement, but the deliberate opinion of one of the most renowned scientists in the world. Read the entire statement:

"We have tested beers repeatedly, placing the bottles in the direct sunlight, and testing the same after one, two, three and five minutes exposure, found that the beer with three and five minutes exposure became undrinkable on account of the peculiar odor developed. The detrimental effect of light upon beer can be successfully counteracted by the employment of brown or dark colored glass bottles, and such bottles are, therefore, recommendable."—Wahl-Henius Institute of Fermentology.

It is not enough that beer be brewed pure, it must be kept pure.

Many Americans prefer beer in a light bottle. Most brewers follow the course of least resistance.

Light starts decay even in pure beer. Dark glass gives the best protection against light. Schlitz is sold in Brown Bottles to protect its purity from the brewery to your glass.

See that crown or cork is branded "Schlitz."

The Beer That Made Milwaukee Famous

THE HAWAII THEATER

Say, Folks---Honestly We Can Run This Picture ONLY TWO NIGHTS

We'd like to keep it here for a week, but we can't afford to—Carnegie won't speak to us and "Jawn D." refuses to cable. But we have certainly got it for Wednesday and Thursday nights, and you'll have two chances to see it.

What Picture?

Oh, yes; what we really started to ask was this—Did you ever hear of a "cosmic thrill"? The expression was new to us, too, but after we tried out the 2-reel picture that we are featuring for Wednesday and Thursday we found out what it meant.

'The Tragedy of the Desert'

gives you that "cosmic thrill." The delineation of primitive love and hate, ecstasy and despair, action and even action in inaction, makes you sit tight until the lights are turned on. It's the thrill and thrill of passion under the desert skies.

NOT SINCE OUIDA WROTE "UNDER TWO FLAGS" HAS SUCH A WEIRD, GRIPPING, INTENSIVE DRAMA BEEN PLAYED. AND IT IS ONE PRODUCTION WHERE ACTION AND NOT TALK CARRIES THE PLOT ALONG. TAKEN IN ALGIERS AND ON THE SAHARA DESERT.

Two Other Films, Too

There's a Western drama—"The Daughter of the Sheriff"—that you'll like, too. And, besides, there's a comedy film coming on the Honolulu. We don't know its title—and we might be mean enough to keep it a secret if we did—but the telegraphic cable that came in last night says it's a corner and full of laughs. Even the waves rippled as it went aboard ship.

No! Absolutely not! Prices are still 10c and 15c

TONIGHT'S BILL IS THE SAME AS THE SUCCESSFUL ONE SHOWN LAST NIGHT. YOU DON'T MEAN TO SAY YOU MISSED IT! GEE!

FRED NOYES, Manager
